For Immediate Release:
San Antonio, Texas, 11-11-09

EarthSeal the most affordable spray foam insulation products on the market.

The past decade has seen a sharp increase in consumer awareness in the areas of energy efficiency and conservation fueling the growth of the spray foam industry. As a result, the field of spray foam manufacturers - once made up mostly of the charter members of the SPFA - is now flooded with new blood as new manufacturers enter the race to introduce new spray foam products with new unique features and benefits for us to gobble up.

This is all well and good, and while no one can deny that a spray foam that could baby sit your kids, recite poetry AND cut your energy bills in half would be great, the decision to buy or not to buy, for most consumers, comes back to the age-old formula: cost vs. benefit. Good news for FoamIt and their newly released EarthSeal spray foam product line with a price that is VERY nice.

Don't misunderstand, the EarthSeal product is no slouch on unique feature with its highest-in-class bio-renewable content, highest-in-class R-value, and its ability to act as a dual-purpose insulation & fire protection. But for those penny-pinchers who don't get turned on by bells and whistles EarthSeal offers yet another unique feature among spray foams - affordability.

Save Money, Save Energy, Just Foam It!
